

School Advice Sessions

The School Engagement Team is part of the Family Intervention Service.

We work with schools to give families information, advice and support.

Do you need support with...?

- Managing challenging behaviour
- Making your home a more positive place for the whole family
- Improving routines and boundaries
- Support around the under 5's with their behaviour, development, and school readiness
- Supporting your child's emotional wellbeing or mental health
- Finding or accessing services to support your family's needs.

Your School Engagement Team Link Worker and school will work together with you to help to address your family's needs and create happier children and families.

You can request a school advice session through your child's school.

Just ask the class teacher, pastoral lead or a member of reception staff.
